HOSPITAL AND MEDICAL COLLEGE INTRODUCTION

Good medical facilities have always been in demand for a the massive population of India. There is a tremendous need to provide the health care to the large population of the country, which has touched one Billion marks. **Hospital of 1000 bed capacity can be set up at cities / district headquarters of the country well connected with roads and rails.** These hospitals equipped with modern medical equipment offers excellent services for the patients suffering from different diseases.

Conditions in our country do not herald as optimistic view. Despite the Govt.'s sincere efforts for providing free medical facilities in large numbers. This report is prepared with an objective to provide basic information about hospital project for the entrepreneurs who may not have a medical background. It covers extensively on various point as under: -

- **Services offered in the hospital**
- **Details on hospital equipments**
- **Supportive facilities**
- **List of medical equipments**
- **Various fixed assets required**
- **No. of medical/paramedical/nonmedical staff required**
- **Cost of suppliers and consumable.**
- **Revenue details.**
- **Man and material movement aspects.**
- **Estimation of cost of project and means of financing/funding.**
- **Estimates of profitability.**
- **Estimation of pay back period & Break - even points etc.**

The report establishes the economic viability of project. Ensuring sections of these reports discuss various aspects of this project:

HOSPITAL WILL HAVE THE FOLLOWING DEPARTMENT

- 1 Anatomy
- 2 Physiology
- 3 Pharmacology
- 4 Community Medicine
- 5 Forensic Medical
- 6 Microbiology
- 7 General Medicine
- 8 General Surgery
- 9 Gynecology & Obstetrics
- 10 Anesthesiology
- 11 Pediatric Medicine
- 12 Neonatology
- 13 Radio Diagnosis
- 14 ENT
- 15 Orthopedics
- 16 Bacteriology & Serology
- 17 Physical Medicine
- 18 Cardiology
- 19 Neuro Medicine
- 20 Hematology
- 21 Nuclear & Experimental Diseases
- 22 Nephrology
- 23 Tropical Medicine
- 24 Surgical Gastroenterology
- 25 Neurosurgery
- 26 Cardiothoracic Surgery
- 27 Plastic Surgery
- 28 Urosurgery
- 29 Endocrinology Psychiatry
- 30 Stem Cell Cancer
- 31 HIV/AIDS

SPECIALITIES OF HOSPITAL

QUALITY CARE

At one-fourth the cost for the normal people and free for poor people.

KEY EXPERTISE

Cancer, surgery, bone marrow, transplant, angioplasty, micro neurosurgery, Parkinson, paralysis, diabetes, HIV/AIDS, Tuberculosis, Gaynor, Child health etc.

FACILITIES

Apart from the state-of-the-art traditional/specialized medical facilities, Hospital will have Indian Heritage medical/medicine facilities such as Ayurvedic, homeopathic, Unani, Yoga, Meditation Holistic, Herbal, Stem cell etc.

MEDICLAIM FACILITIES

Hospital will have the arrangement for all the indoor patient **MEDICLAIM** facilities with the association of various Govt. & other agencies for best treatment.

PREAMBLE

Recent advancements in medical science and technology have radically changed the part and practice of contemporary medicine. Many new diagnostic and therapeutic modalities have been developed and perfected during the past two decades.

Although, most of these techniques are capital intensive, these are highly efficient, safe and cost effective.

Improvements in National economy and literacy rates have changed the pattern and extent of the use of health care services in the country. People are becoming aware of their health needs and are acquiring the ability to make a deliberate choice of the health services they need. Consequently, the demand for better quality Medicare is rapidly increasing. Staff benefits in government, trade and industry and third party financing of Medicare through voluntary and social insurance are further increasing this growing demand.

India is a developing economy with diverse needs. On account of resource constraints and overriding priorities in other sectors, public investment in health care has not kept pace with the increasing demand and the gap between need and availability of health care facilities is rapidly widening. This inadequacy is further compounded due to technical inefficiency and inequitable distribution of the existing health infrastructure. **In order to facilitate balanced development of health care facilities in the country**, voluntary and corporate investment in contemporary Medicare at secondary and tertiary levels is being encouraged through a policy to complement the efforts of the government and to maintain equilibrium between the three levels of health care.

Minimum bed will be Two Hundred and having all the required facilities for the surgery. Child care, Maternity, Aid Control, T.B. And other sections for General and specialized diseases like **Cancer, Parkinson** etc. the facilities proposed will be comparable will be comparable to the best not only in the country but will be International Standards.

OBJECTIVES

The hospital will have a hierarchy of objectives. viz. Service, Training and Research. The most important objective for which the hospital will make all out effort will be to provide high quality service at an affordable cost not only for the affluent sections of the society, but also to those who may not be economically well off. The outpatient services will be provided on the concept of polyclinics and referral clinics. The outpatient service will be provided not only in the morning hours but also through special clinics in the afternoon and in the evening.

It would be the endeavor of the hospital to treat patients through ambulatory care as far as possible.

Those who need admission will first be fully investigated wherever possible through the diagnostic departments.

As far as diagnosis standards are concerned, the hospital will be a rich adjustment with all the required equipments like : (1) X-Ray Unit, (2) Radiography Machine, (3) screening Machine, (4) E.C.G. Unit, (5) X-Viewer, (6) Blood-pressure measuring instruments, (7) Stethoscopes, (8) Surgical Instruments, (9) Wheeled chair, Stretchers, (10) Ambulance, (11) Staff Cars, (12) Various staff uniforms including gloves, (13) Masks and appearing, (14) Oxygen cylinders (15) Blood bank, (16) Glucose & Water introducing equipments. Ultra Sound and several other equipments and instruments of use of diagnosis of the disease and its treatment relating to ears, lungs, kidney, ear, nose and throat and similar other organs of the body. Brain and bone specialization, cancer treatment and research will take special status in the R & D of the hospital in the Allopathy line of treatment. Separate T.B. Wing, Homeopathy, Unani, Ayurvedic, Yoga and Meditation treatment provisions and beds facilities will be a special feature of the hospital. Specialists will be duly appointed in these fields of medicines and surgery. This will ensure maximizing the inpatient beds, provide quality care, and provide cost reduction and affordable services to the patients. The hospital will also take services to the community as Out Reach Programs through camp approach, domiciliary care, home-care programme, etc. so that there is no wall between the hospital and the community and the hospital truly becomes an integral part of the community.

TRAINING

The component of training will be built in from the beginning itself so that only the staff having proper training will be permitted at the time of appointment and periodic training both in-service and on job while in hospital. The hospital will also have formal teaching for the nurses and the Paramedical staff. The hospital will also have the recognition of DNB course where by not only will a big level of teaching be ensured but will also ensure super specialty training and education for doctors. The hospital will also provide formal teaching for the whereby not only will a high level of teaching be ensured but will also ensure **superspeciality training and education for doctors**. The hospital will also have international affiliations and exchange programs. This will ensure high standards of patient care.

PRINCIPLES

The principles, which have been kept in mind while making the report are as under :

- The hospital will take into consideration the requirement of the patients and the community inter-alia the cultural environmental and social background of the community and the adjoining areas.
- Taking into consideration the principle at Sub-Para above, it is however, desired that the hospital after commissioning must be able to break-even income versus expenditure as early as possible.
- The design of the building will be prepared so as to fully satisfy the professional requirement of the medical staff, nursing staff, paramedical Staff, etc. and that the modern principle of planning i.e. "**design must follow function**" is completely followed. The design of the building will also take into consideration the requirements of the patients, relation and the other community members so that they are satisfied and also their socio-cultural background is provided. The building design will take into consideration maintenance and house keeping so that after commissioning, it is easy and economical to maintain.

The aforesaid principles will be kept in mind while working out the human resource requirement, equipment etc.

PLANNING PARAMETERS

In order to provide efficient hospital care and to achieve patients and community satisfaction, the hospital will have the following parameters of service.

WATER

Water will be available in all areas, in all the taps, round the clock so that good hygienic practices are carried out and various hospital procedures are aseptically performed. **The water requirements will be 600 liters per patient per day with a holding factor of 6 days to provide adequate capacity in case the supply from the mains of water is temporarily cut off for reasons of maintenance, testing, etc. the portability of water will be ensured through quality control. Hospital will have pipe lines for drinking water and for sewage requirement of the hospital for which tube well water may be used.** As these alterations are not possible after the building is complete, they will be kept in mind at the planning stage itself. Tube well water will be got tested to ascertain suitability for drinking purpose for use in case corporation supply is temporarily not available.

R.O. water will be supplied for drinking purpose in the hospital.

ELECTRICITY

Hospital will have a HT line supply of 2000 KVA. The line will be supplied from **2 grids to ensure continuity of electricity in care of power failure of any of the Grids.** Hospital will have a step down transformer which will step down the supplied to required levels. Hospital will have **3 Nos. standby [Silent] Generators** to maintain the emergency requirement of the hospital in the event of power failure. **The generators will be on AMF panel** to ensure that the electricity supply is restored automatically within a few seconds of power failure. Selected areas of the hospital will also be backed by **4 - 5 Nos. Online UPS [15KVA with 3Phase in & 3Phase out and back-up time 15 Minutes]** connection of ensure 'zero' breakdown in essential areas.

SEWAGE DISPOSAL

Hospital will strictly adhere to the pollution control norms. The sewage will be first treated through the '**Sewage Treatment Plant**' prior to release to the Corporation sewer line. The final affluent will be in accordance to the Pollution control norms.

GARBAGE DISPOSAL

The garbage arising out of the hospital will be segregated at the source itself in 4 different colored bags. These bags will be stored in the corresponding colour coded garbage drums and disposed through incineration, microwave and shredding. **The syringes and needles will be destroyed prior to disposal in the garbage.**

NATIONAL HEALTH POLICY

The Constitution of India envisages the establishment of a new social order based on equality, freedom Justice and the dignity of the individual. It aims at the elimination of poverty, ignorance and ill health and directs the State of regard the raising of the level of nutrition and the standard of living of its people and the improvement of public health as among its primary duties, securing the health and strength of workers, men and women, specially ensuring that children are given opportunities and facilities to develop in a healthy manner.

Since the inception of the planning process in the country, the successive Five Years Plans have been providing the framework within which the states may develop their health services infrastructure, facilities for medical education, research, etc. similar guidance has sought to be provided through the discussions and conclusions arrived at in the joint Conferences of the Central Councils of Health and Family Welfare and the Development Council. Besides, Central legislation has been enacted to regulate standards of medical education, prevention of food adulteration, maintenance of standard in the manufacture and sale of certified drugs, etc.

While the broad approaches contained in the successive plan documents and discussions in the forums have generally served the needs of the situation in the past, its is felt that an integrated, comprehensive approach towards the future development of medical education, research and health services requires to be established to serve the actual health needs and priorities of the country. Stills the hospital will have the special homeopathic, Yunani, Ayurvedic, Yoga and Mediations to avoid maximum allopathic and surgery.

PRIORITIES IN HEALTH SECTOR

The government is actively promoting projects in the health sector for achieving significant reeducation in the levels of morbidity and mortality due to communicable and non-communicable diseases. The diseases given special emphasis during the eight five-year plan (1992-97) were :

1. Malaria Eradication
2. Kala Azar and Japanese Encephalitis
3. Leprosy Eradication
4. Tuberculosis control
5. Blindness control program
6. Guinea Worm eradication
7. AIDS control
8. Diarrhea diseases
9. Cancer Control
10. Control of iodine deficiency disorders
11. Diabetics control
12. Mental Health Services

RURAL & URBAN HEALTH SERVICES

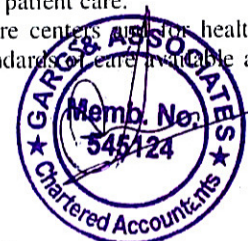

This project of super specialty hospital and medical college gives world class medical facilities to the peoples from rural as well as urban area in rural areas we did not have good hospitals and medical facilities because most of these kind of projects are established in the big cities but we want to establish this project in the village where more than 100 villages are connected with it and there most of the peoples are unemployed, not getting good treatment, not educated so much due to that and due poorness they did not afford or getting good treatment but our motive is to generate employment, give education and good medical facilities with very low cost or without any cost to the poor peoples by this project we give life time facilities to peoples of these villages and we also want to tell you that by this project we also gives ambulance facilities free to poor peoples so they use it and come to the hospital for treatment for this we place duties of ambulances in the villages like at dispensary in villages. so people go there and call our ambulance or call them by phone. we need this project fund for the development by all means of villages. other thing about this project are very clear and it all done for the motive of serving the humanity.etc.

SECONDARY AND TERTIARY CARE SERVICES

Along with the emphasis on consolidation of primary health care, the strengthening of secondary care services and optimization of tertiary care services would be the key objectives of the Eight Plan.

The sub-divisional and district hospitals, which are the secondary level, medical care institutions, lack adequate manpower and facilities, to be able to discharge their responsibilities satisfactorily. In view of the resource constraints, there is need for raising resources to maintain the quality of care and meet rising expectations of the people. It is time that the concept of free medical care is received and people are required to pay, even if partially for the services. The systems can be so designed that the truly indigent population are able to get free / highly subsidized medical care. Innovative approaches / practices to this end a system of medical audit will be developed during the plan. Maximum cost-effective utilization of existing services will be another item on the agenda.

- In accordance with the new policy of the Government** to encourage private initiatives, private hospitals / clinics will be supported subject to maintenance of minimum standard and suitable returns for the tax incentives norms for minimal facilities and accreditation of private hospitals/ clines would be developed to maintain quality of patient care.
- The medical college hospitals and specialized hospitals have to be used exclusively** as terrier care centers and for health manpower development. Important prerequisites for this would be improvement in the facilities and standards of care available at secondary care level and development of strong referral system.

- **A conscious decision has to be taken to enforce a balanced development of primary, secondary and tertiary care services in the country with priority for primary health care. Otherwise there is distinct risk of the paradigm of primary health care as a tool for "Health for All" being overrun by the mechanism of all for a few". This tendency and trend can be halted only with scientific arguments for which sound epidemiological, health management and health financing data is need and hence the need for health systems research.**

ACCIDENTS

For the treatment and rehabilitation of accident victims, accident and trauma services will be started in major cities and also, on pilot scale along some of the high traffic density national highways.

MEDICAL RESEARCH

The Indian Council of Medical Research (ICMR) is the premier institution, which is responsible for carrying out bio-medical and operational research in India. Important achievements of the **ICMR** during previous plans include: demonstration of improved vector control using bioenvironmental techniques for control of malaria and filarial; establishment of national Cancer Registry; multi drug therapy and short course chemotherapy for leprosy and TB respectively and a national surveillance system for AIDS infection. Various other institutions under the Ministry of Health & Family Welfare and medical colleges have done notable work in the field of medical research.

The following functional areas and services have been identified:

- Entrance
- Ambulatory Care
- Intermediate Care
- Critical Care
- Operation Theatres
- Casualty and Accident Emergency Care Services :
 - Clinical
 - Diagnostic
 - Dietary

OTHER AREAS

- Administrative wing
- Conference room with audio-visual aids
- Research and Development area
- Central Store
- Manifold Room
- Medical Record Department (MRD)
- Hospital Library
- Telephone Exchange
- Air-Conditioning Plant
- Electric Substation
- Generator Room
- Water Tank
- Work Shop
- Bio-medical and Computer Engineering
- Public Relations
- Publications, Documentation and Photographic center
- Mortuary
- Area for waste Disposal

RESIDENTIAL AREA

- Director Residence
- Residence for Nursing Superintendent.
- Staff Quarters
- Guest House
- Recreation Centre

COMMUNITY CENTRE

- Canteen cum fast food counter
- Computer Facility
- Telecommunication Centre

ENTRANCE AREA

- Hospital will have four entrances for regulation of traffic to the hospital.
- OPD entrance**
- Entrance for Casualty and Accident Cases**
- Main Entrance / Visitors Entrance**
- Service Entrance**

AMBULATORY CARE

The ambulatory care services will comprise of the OPD patients. Broadly the services will compose of the consultation chambers, the diagnostic services as well as the OPD Patient support services. The ambulatory care diagnostic are will provide the services of Imaging, Laboratory, Respiratory Lab, Sleep lab and the Non invasive Cardiac Lab.

The support services will also provide facilities for minor surgery, injection, dressing, ECG etc.

MOBILE HEALTH CLINIC

The Mobile health Clinic will be develop to cover the rural and urban Masses belong to the below poverty line

INTERMEDIATE CARE AREA

The intermediate care area will provide services based on the concept of progressive patient care. It will consist of General ward, Economy ward, Semiprivate ward, VIP suites and the Critical Care area. The charges will be graded to suit the socioeconomic status of the patients.

The Category wise bed distribution of the Hospital for 1000 beds will be as under :-

<u>Area</u>	<u>No. Of Beds</u>
Critical Care Unit - I	50
Critical Care Unit - II	50
Private Suite	25
Private Single Rooms	200
Semi Private Twin Sharing Beds	200
Economy Ward	200
General Wards	250
Isolation Beds	25
TOTAL	1000

CRITICAL CARE UNIT UNITS

The Critical Care areas will provide facilities for treatment to the critically ill patients. Hospital will have 2 critical care areas namely critical care area-I, and II. Facilities of the best of its kind will be made available for these patients. Critical care specialists will manage the unit round the clock. High quality equipment will be made available so that the patient could have the best chases of survival.

OPERATION THEATER COMPLEX

Hospital will aim at performing surgery in an environment whereby the incidence of infection during surgery is brought to minimum possible levels. The Operation Theatres will be planned to permit any and of surgery be performed at the hospital. All the operation theatres of the hospital will be centralized and clubbed together under on complex. Operation Theater will be planned on the Zonal concept. It will have the following zones:

- Normal Zone
- Protective Zone
- Clean Zone
- Aseptic Zone
- Disposal Zone

The circulation of patients, staff and supplies in the operation theatre will properly channelize. The Complex will have three main theatres and on for minor surgery/ infected surgery. Operation Theatre will also have a Theatre Sterile Supply Unit. (TSSU) which have fealties for emergency sterilization. The bulk of the sterile supply will be obtained from the Central Sterile Supply Department (CSSD).

CASUALTY AND ACCIDENT EMERGENCY DEPARTMENT

All emergencies attending the hospital will report to the Casualty Department. The Department will have 3 examination beds and 4 observation beds. The department will share the diagnostic facilities in common with the OPD and will work round the clock.

CLINICAL SERVICES

Hospital will provide clinical services to the tertiary care level in Respiratory Medicine, Critical Care and Sleep medicine. In addition the centre will also provide support services for the above specialties in the other specialties and super-specialties.

The Consultants will possess a minimum qualification of MD, MS, DM, M.ch or DNB in the respective specialties. The Senior Resident medical Officers will possess Post Graduate Degree / Diploma. The Resident Medical Officers will have a minimum of MBBS qualification.

DIAGNOSTIC SERVICES

The hospitals will emphasis on diagnostic services. The mainstay of the diagnostic services will be the imaging, laboratory services and the Non invasive Cardiac Lab. **IMAGING SCIENCES AND NUCLEAR MEDICINE**

The imaging services will provide facilities for, CT scan, Digital and conventional X-Ray, Ultrasound, and Dopier studies.

CARDIAC LAB

The Cardiac lab will have ECG recording, 24 Hours Holder recording and analysis, Stress Testing and Echo Cardiograph.

LABORATORY

The Laboratory will provide facility for

- Hematology
- Biochemistry
- Microbiology
- Histopathology
- Serology

DIETARY SERVICE

Dietary services of a hospital are an important therapeutic tool. Properly rendered, it is a clinical and administrative means for rapid recovery of patients.

Hospital will have an in-house Kitchen. The hospital kitchen will be responsible for supply of diet to the patients, both normal and therapeutic. The kitchen will aim to provide a well cooked and a nutritious diet to the patient. Food will be cooked in a hygienic environment. Hospital kitchen will be monitored by the Dietician of the hospital. Diet will provide to all the patients of the hospital.

CENTRAL STORE

Hospital will have a central store providing all the hospital supply. The Central store will have the subsections of Medical and gasses store, nor medical store and store for waist items for sale through auction like IV bottles, used fixer and developer solutions etc.

CENTRAL STERILE SUPPLY DEPARTMENT (CSSD)

Sterilization of equipment is one of the most essential requirements of the hospital, hence will be given the utmost consideration in planning. The depart will be centralized because centralization will increases efficiency, improve economy and ensure better supervision and control.

CENTRAL STERILE SUPPLY DEPARTMENT (CSSD)

Sterilization of equipment is one of the most essential requirements of the hospital, hence will be given the utmost consideration in planning. The department will be centralized because centralization wills increases efficiency, improve economy and ensure better supervision and control.

The CSSD department will be responsible for the completer sterile supply requirements of the hospital including the operation theatre. The department will provide provision for high-pressure steam sterilizations as well as dry heat sterilization. The CSSD department will also undertake the packing of common sets like the syringes and needles, dressing sets etc.

PHARMACY

It is proposed to have a Pharmacy and a medical store. The pharmacy will be given on contact and will supply only the out patients of the hospital. It will be planned in the community center of the hospital and will be open round the clock. The Medical Store will be of the hospital ad will supply medicines to the in patients. The medical store will also be open round the clock.

MORTUARY

This will provide facility for proper storage of the dead bodies. The bodies will be stored in a refrigerated mortuary cabinet. Hospital will be not having facility for autopsy.

The mortuary will be so located so that the dead bodies can be transported unnoticed by the general public and patients. Relatives and mourners will have a direct access to the mortuary. The hearse van will also have a direct access to the mortuary whereby the body could be directly removed. The mortuary will have place for performing last rites.

MANIFOLD ROOM

Hospital will have a central supply for central oxygen, central nitrous oxide, central succession and centralized compressed air for the vital area of the hospital as well as the area where heavy commutation is expected. Nitrous oxides and compressed air will be required only in the operation theatre. These facilities will be provided from the manifold room.

MEDICAL RECORD DEPARTMENT (MRD)

Hospital will provide update facilities for systematic maintenance of records. The records keeping will be fully computerized to start with. The record department will provide ready statistic on the hospital patients for administrative review as well as for clinical meetings and conferences.

TELEPHONE EXCHANGE

Hospital will have a centralized EPABX system with adequate capacity. 10 external lines and 100 internal lines will be installed in the initial stage. The system installed will be expandable to suit the later requirements of the hospital.

AIR-CONDITIONING

Most of the areas of the hospital will be Central Air-Conditioning. The Operation Theatre will have installation of HEPA filters or Electronic Filters, suitable for filtering the microorganisms in addition to the dust and particulate matter. The Intensive care area will have the installation of micro filters.

MARKETING STRATEGY

Marketing strategy will play an important role in ensuring the success of this project. There will be a number of obstacles in the way of achieving full utilization of this hospital. There is no doubt that a well equipped super-specialty hospital of the kind we are planning will be fully utilized in the course of time, but the hospital has to achieve financial viability within a short period. It would, therefore, be necessary to ensure maximum utilization right from the first year. Accordingly a great deal of prelaunch marketing will need to be carried out in order to ensure that the public and the medical profession are fully aware of the sophisticated nature of facilities available. Schemes will need to be introduced in order to ensure that more and more persons find it convenient to use the hospital.

AYURVEDA

Ayurveda is an ancient system of disease prevention, health care, and healing that originated in India thousands of years ago. Ayurveda is made up of two Sanskrit words. Ayur which means life, and Veda which mean the knowledge of the most ancient sacred writings of Hinduism written in early Sanskrit; traditionally. Ayurveda, the diagnosis of disease and individual constitutions is done by balancing the different energies in the body. These energies are called doshas or body hormones. The specific names for them are (TRIDOSA) Vata, Pitta, and Kapha. The literal meaning of dosha is 'fault' because these three humors are the three ways in which the body tends to move out of balance. The Dosha are the three main combinations of the five elements (either, air, fire, water, and earth). When any of these elements are present in the environment, they will in turn have an influence on us. The foods we eat and the weather are examples of the presence of these elements. These five elements in the body can be balanced through diet and herbs that possess the essence of this element each person's constitution is made up of a unique combination of these doshas. The ratios of the doshas vary in each individual and because of this, Ayurveda sees each person as a special mixture that accounts for diversity.

Ayurveda provides a model to look at each individual as unique makeup of three doshas and to thereby design treatment protocols that specifically address a person's health challenge. When any of the doshas (Vata, Pitta or Kapha) become dominant, Ayurveda will suggest specific life-style and nutritional guidelines to assist the individual in reducing the dosha that has become excessive. Herbal supplements may be suggested to facilitate the healing process. If toxins in the body are abundant, then a cleansing process known as Pancha Karma is recommended to eliminate these unwanted toxins. The following descriptions are the treatments said in Pancha Karma. Many of them are performed by two ayurvedic therapists working together. Two, three and sometimes four therapies may be given in a single day.

HOMEOPATHY

Homeopathy system to medicine based on the law of similar that like is cured by like. In homeopathy a drug that produces the same symptoms a disease (e.g., quinine given to a healthy person mimics malaria) is used in small doses to treat that disease.

Classical Homeopathy is based on the recognition that health and disease depend on the individual's life force (i.e. vitality, or dynamic energy), state of susceptibility, and inherited predispositions.

In other words, it is a complete, normal system that gives relief from suffering and restores physical, mental and emotional health. Classical Homeopathy takes me longer to find out a single remedy for a range of symptoms, which affect the whole totality of the person.

Homeopathy encourages and strengthens the organism, thereby stimulating and engaging the body's natural healing forces. Rather than suppressing symptoms, driving them to a deeper and more serious level. Homeopathy remedies are based on the Law of Similar, **similibus curentur**, or "let likes be cured by like".

Homeopathy Consultants do not deal with isolated "symptoms" but with the complete body therefore rather than taking specific medication for one symptom, another specific medication for another, and yet a third medicating for something else, Homeopathy deals with the all the characteristics and recommends a remedy which does not kill bacteria but strengthens the immune system to rid the body of the bacteria. This is called a constitutional remedy.

It is important to note that homeopathy is NOT based on the same principle as immunization, which uses substance that cause the same disease, not similar symptoms immunization is based on homeopathy giving a substance known to cause the exact disease in question. Also immunization has immunological bases to it, i.e. the production of T-memory cells; whereas the mechanism of action of homeopathy is unknown at this time. However, there are several models that try to explain it, but none are sufficient. In short, homeopathic medicines have no relationship to the diseases in question, but rather the symptoms in question.

Homeopathic remedies are made from normal substances, plant, mineral and animal a "mother tincture" is prepared from the natural base substance with distilled water or alcohol, and then diluted many times until it reaches a micro-dose state. This guarantees the absence of tonicity and side effects. For a reason not quite understood, the much diluted medicines have a higher potency or greater strength and act more deeply.

UNANI

Unani Medicine, is based on the principles put forward by Hypocrites and exploited assimilated by the Medieval Muslim physicians hypocrites was the first person to establish that disease was a natural process. That its symptoms were the reactions of the body of the disease, and that the chief function of the physician was aid the natural forces of the body. He was the first physician to introduce the method of taking medical histories, his chief contribution to the medical realms in the humeral theory.

NATUROPAHAY

Naturopathy, or Naturopathic Medicine, is a distinct, integrated system of primary contact health care offered by licensed practitioners, naturopathic Medicine promotes diagnosis, treatment and prevention of human disorders by the therapeutic use of non-invasive, none-pharmaceutical means that include Clinical Nutrition, Herbal Medicine, Homeopathy, Mechanotherapy (also known as Naturopathic manipulation or realignment), and Traditional Chinese's Medicine (pulse and herbs, acupressure and acupuncture). Naturopathy takes into consideration all of the fundamental components of a person the biochemistry, biomechanics and the emotional predisposition in order to help a person restore themselves to state of balance or good health, generally speaking, this is the definition of holistic medicine i.e. taking into account all of the component parts of the persona chemical, structural and emotional features of the individual. They are interconnected each one will have a dynamic effect on the other during the course of treatment. In addition to being a source of primary contact medicine with a holistic philosophy regarding treatment, Naturopathic Medicine offers real cost effective solutions for many of our nation's health care problems. Respect for both tradition and innovation are the hallmarks of Naturopathic Medicine.

The main principle behind Naturopathic is the belief that the body has an innate ability to heal itself it should be understood that the concept of self-healing does have limitations. This thinking points to the importance of supporting the body's natural vitality, which promotes self-cleansing, self-repair and therefore self-healing. This process can be achieved by focusing on the immune, hormonal, nervous and detoxification/elimination systems of the body. Once these systems are in balance, the body can once again achieve homeostasis. To do this efficiently, Naturopathic doctors treat their patients holistically i.e. taking in to consideration their individual biochemistry, biomechanics and emotional predispositions. The body's self-healing ability can be better understood if one takes into account how the body reaches homeostatic or balance when it is challenged. A good example is fever. When the body is invaded by a pathogen (a substance capable of producing illness or disease), it will usually respond by producing fever to fight the invader, if the body is properly supported e.g. nutrition and rest; the fever will help in the eventual recovery of the person. Other examples are the immune system, hormonal system nervous system and detoxification/elimination system, which work as a unit to ensure our survival. If given the proper support, care and the chance to function freely without suppression, they can bring the system back to a state of balance or "**ease**" (as opposed to "**disease**").

There are no panaceas, magic bullets, potions or remedies. Each individual has their own unique set of symptoms and reactions. Which will, in turn, dictate the approach the naturopathic doctor takes to treat the patient? This is why each person seeking help from a naturopathic doctor will receive a relatively individualized treatment portion Naturopathic medicine is not a solitary system of care, naturopaths work with other practitioners offering wide range treatments.

The goal of Naturopaths is to develop optimal wellness for each patient, and to educate them with the intention of cure and/or prevention. Although naturopathic doctors are educated and trained to treat acute and chronic disease, prevention is the ultimate goal. This is based on the Naturopaths philosophy that is the philosophy of health care, not illness care

ACUPUNCTURE

Acupuncture involves the insertion of fine needles through the skin and tissues at specific points on the body. There is no injection of any substances and the treatment itself causes minimal discomfort Acupuncture is very effective in treating a variety of painful disorders, both acute and chronic. Acupuncture works due to its effect on the essential substance that makes up the human body and enables it to sustain life activities and functions. This "substance" for a lack of a better word, is known as Chi or Qi (pronounced "chee"). Western biomedical research has learned that acupuncture works in certain situations by stimulating the body to produce endorphins, a morphine - like chemical that helps block pathways that really pain messages. The result is relief from pain, general relaxation and restoring the body's own internal regulatory system.

The world Health Organization 1979 drew up the following provisional list of disorders that land themselves to acupuncture treatment. The list is based on clinical experience and not necessarily based on controlled clinical research:

- Digestive disorders such as gastritis, hyperacidity, spastic bowl, Constipation, diarrhea;
- Respiratory disorders such as sinusitis, bronchitis, asthma;
- Neurological and muscular disorders such as headaches, neck and back pain, neuralgia, frozen shoulder, tennis elbow, sciatica, arthritis;
- Addiction and substance abuse and
- Sleep disorders such as insomnia, sleep apnea.

PARA MEDICAL

Hospital will have the following **PARAMEDICAL** facilities for proper diagnosis.

1. CT SCan (Multisilice, Multi-detector)
2. X-Ray
3. EEG
4. TMT
5. MRD
6. LABORATORIES
7. ENCOSCOPES
8. CSSD
9. CATH LAB
10. INFO TECH.
11. MRI
12. ULTRA SOUND
13. ECG
14. PERFUSION
15. MAMMOGRAPHY
16. NUCLEAR MEDICINE
17. PHYSIOTHERAPY
18. ECHO
19. OTHER FACILITIES

LIST OF EQUIPMENT

1. X-ray Machines (Big)
2. X-ray Machines (Small)
3. Cat Scan Machine
4. MRI Machine
5. ECG Unit
6. Incubator
7. Ultra Sound Machine
8. Photo Therapy Unit
9. Othiologi Scope
10. Jan graphic Equipment
11. Blood/Urine / Stool Testing Equipment
12. Blood Pressure Equipment
13. Surgical/Operative Instruments
14. Doctor's Stethoscope
15. Film Projector
16. ENT and Testing Machine
17. Eye Testing Equipment
18. Dental Equipment and Accessories
19. Cardiology Equipment
20. ECHO Cartographic Machine
21. Medical Kits and Others
22. Lab Equipment
23. Library
24. Hotel Equipment and Accessories
25. Hospital Equipment and Accessories
26. Ker meter
27. Fumigator
28. Auto Equalizer
29. GBC Equalizer
30. Neurological Equipment
31. ECHO Endo-Graphic Machine
32. Laser Surgical Equipment
33. Orthopedic Equipment
34. Physiotherapy Equipment
35. Ophthalmoscope
36. Sand Graphic Equipment

MEDICAL EQUIPMENT

The medical equipments required for the hospital have been indentified in accordance with the following criteria.

To Ensure that each of the departments of the hospital, preference has been given to equipment based on modular design to upgrade the facility at a later date thus effacing cost savings.

To be cost effective with respect to performance. Recommendations are based on latest period equipment without compromising on desired functional capabilities. **Reliability of the equipment suppliers in terms of lead time.** In staked base, technical specifications and infrastructure available for providing service support during and beyond warranty period.

HOSPITAL INFRASTRUCTURE

The various departments, infrastructure of hospital are as follows : Pathology, pediatrics & neonatology, nephrology, pod gastro entomology, casualty, emergency, cardiology, ophthalmology, physiotherapy, orthopedics, gynecology, radiology, central sterile OT ENT mortuary hospital furniture.

HISTOPATHOLO GY

BINOCULAR MICROCOPE

Automatic tissue processor for complete automatic dehydration and filtration of human tissues unto final fixing in wax. **This has a pre-programmable provision** for dehydrating cycle (use selectable). Tissues are subjected OT continuous agitation by rotating stainless steel tissue basket for trough penetration of reagents. The wax bath temperature controlled and maintained by a thermostat. **Precision rotary microtome for precise serial sectioning.** Adjustable from 1 to 30 micron in step of I micron. Freezing microtome for freezing with the help of evaporation of carbon dioxide gas around the specimen. This allows section thickness range between 54 C microns in step of 5 microns. It can be clamped at a corner of worktable.

Tissue flotation bath for preparing distortion less and wrinkle free tissue specimens / the thermostat control provides and accuracy of 2

C with a range from ambient to 70 C for drying the wet slides.

Block holders for holding the wax block for taking sections on the microtone.

Tissue embedding modules for the preparation and taking of tissues section. Blood cell count for counting cells and simple computations including percentage. It thus 6 units. Each unity counts upto 999 and last unit totalized the difference calls. Micro slide cabinet for accommodating 5000 sliders.

Vertical laminar airflow cabinet for localized high quality clean working environment. This is catered for to provide an atmosphere free from air born particles with laminar air flowing downward the worktable. The working area is 4 ft. x 2 ft x 2 ft. the filters retain all air born particles of size 0.3 microns and larger.

BLOOD BANK

Refrigerator for keeping blood bottles or blood bags. The temperature range is maintained between 4-6 degrees centigrade.

Audiovisual alarm is available is the event of fluctuation exceeding permitted tolerance.

HEMATOLOGY & SEROLOGY

- Water bath for evaporating liquids like alcohol or for melting solids as agar. This can accommodate containers of various sizes and has automatic cut off device when the bath gets dry.
- Water bath (serological) to handle clinical procedures, incubatin, agglutination as well as many serological, pharmaceutical & biomedical procedures. This has 6 racks in the inner chamber and has thermostat control for immersion heating elements.
- Hot air ovens (2 Nos. of different sizes) for destination bacteria, viruses, fungus and sterilize glassware's etc. by application of dry heat with thermostat temperature control ranging between 50-250 degree centigrade.
- Bacteriological incubator for a variety of uses such as drying and staining of slides, paraffin embedding, tissue culture work, crystallization studies and incubation of hydroxyl steroids. The temperature control is from ambient to 80 degrees centigrade. The size of the inner chamber is 455 x 455 x 455 mm.
- Shaking machine for shaking bottles or flakes of different sizes.
- Electrophoresis equipment
- Refrigerators (2 Nos.)

- Centrifuge
- Modular microscope
- Precision balance
- Colorimeter for a variety of colorimetric analysis. It has eight filter to cover the whole visible range of the spectrum and the meter reads directly the percentage transmission of the optical density of the solvent.

MICROBIOLOGY

Binocular microscope some of the equipments in other sections of pathology will be use by this sectin as well.

BIOCHEMISTRY

Lab system analyzer to analyze different blood chemistry test like glucose, urea, cholesterol, hemoglobin, total protein etc. Spectrophotomer for colorimetry.. It has digital display of percentage transmission or optical dentistry, the range is 340-950 milli micro suitable for colorimetry. **Flame photometer** with compressor for rapid and accurate determination of alkali and alkali earth metals. Narrow brand-pass filters for sodium and potassium are supplied as standard. Light emitted by the flame, into which a solution of the salt is atomized, is measured by a hermetically sealed photo diode.

GLOCOMET

ER

Hot air oven for destroying bacterial, viruses, fungus and sterilize glassware's etc. by application of dry heat.

PEDIATRICS & NEONATOLOGY

Infant incubators with control for air (or baby) temperature, humidity and oxygen at uniform selected levels.

Phototherapy unit for treatment of jaundice in neonates. Cardio respiratory temperature monitor for reliable detection of anemic episodes and cardiac dysfunction particularly in infants.

NEPHROLO

GY

Haemofialysis machine with deionizer for a single patient, which enable diluting dial state concentrate at a prescribed concentration and supplying the diluted dial sate to the dialyses. Both bicarbonate and acetate programmers are available. It has ultra filtration rate control system. Which enables top monitor precise fluid removal from the patient's body in accordance with a predetermined time schedule. An accumulative UF amount is displayed at every moment and completion of fluid removal is indicated through an alarm buzzer. Digital display of dial sate pressure, venous pressure and dialysate conductivity with alarm facility is available. This department can be augmented with additional hem dialysis machines depending on the requirements i9n the near future.

OUT PATIENT DEPARTMENT

(OPD)

- Respiratory function inspection analyzer for respiratory function screening to be located in the consulting room. The parameter is automatically calculated with only one examination (taking approx. 90 seconds) and the results (data curve & judgment) are printed out in approx. 30 succeeds. Thus it provides accurate data for effective diagnosis of respiratory functions.
- BP apparantus
- Stethoscope

Each of the consultation rooms in the pod will be suitably equipped for examination. Other facilities available in OPD are covered under separate heads of functional specialization / departments.

GASTRO-ENTEROLOGY

Gastro intestinal fiberscope for endoscopy procedures within narrow 9.8 mm insertion tube, wide 2.8 mm instrument channel and high quality optics, this serves as a multipurpose fiberscope for treatment and routing examinations.

Colonoscope for endoscopy procedures. This colon fiberscope has a high degree of insert ability due to its slim external diameter of 13mm and allows for accurate angulations due to the application of a wide 120 degree. This scope allows flexibility of function and so also suitable for routine procedures.

CASULTY/

EMERGENCY

Ambusystem for infants & adults (4 each) are catered for use both in emergency / or. The facilities available in other department. depending upon the requirements.

CARDIOLOGY

ECG Machines one in cardiac center, two in opd.

Cardiac monitors 3 in icu, 4 ccu and 2 in major ots. Intelligent monitoring with comprehensive alarms, display of selected functions and automatic heart rate setting are available along with peripheral pulse option.

Multi parameter monitors for monitoring ecg, single invasive blood pressure, peripheral pulse, dual temperature & respiration (2 in major ots one in recovery room and one in ICU), alarms for bradycardia tachycardia a systole and irregular qrs vailable, apnea alarms given for delays of 10, 20, or 30 seconds, temperature measuring range is 12-44 degrees centigrade. Display of blood pressure wave forms with derived values of systolic, diastolic and mean pressure is available.

Central nursing satins (2 nos.) with combined multi-bed ecg (6 channels) and multi-parameter monitoring in ICU / CCU. Queuing facility enable 3 simultaneous alarms to be recorded. Wave form, bed number, heart rate fault and status indications are displayed on screen.

Defibrillator monitor recorders, one in each to and cardiac center. Defibrillator changing in less than 100 second. Energy restricted to 50 joules when internal or neonatal paddles are connected. On - Screen display of heart rate and prescribed limits in monitor made is available. Alarm given if no systole is detected for 3 seconds.

Cardiac pacemaker in major ot. **Stress test system** with tread mill in cardiac center.

OPHTHALOMOLOGY

- Ophthalmoscope
- Lensometer for power measurement
- Operating microscope
- Cataract extractor
- Trial Case
- Radioscopy
- Monometer
- Lees screen
- Ophthalmometer
- Slit lamp
- Ophthalmic instruments

PHYSIOTHERA

PY

Nerve & muscle stimulator with galvanic interrupted galvanic faradic and surged faradic currents.

Short - wave diathermy for therapy of body tissues through deep heating without excessive temperature elevation of the skin surface and subcutaneous fatty tissue. High frequency physiotherapy unit for treatment of sprains of muscle and other physical ailments. The ultrasound energy reaches the muscle at a depth and massaging effect is obtained without pain to the tender part of muscle. Intermittent / constant lumpier - cum cervical traction unit. Transaction nerve stimulator Static cycle exercisers (adult & Junior). Quadriiceps exercise table.

Miscellaneous (including infrared lamps, ultraviolet lamps, weight & pulley system etc.)

ORTHOPEDICS

Colposcope for rapid examination of pathological changes directly visible to the eye such as carcinoma of the cervix. It can be easily moved for rapid bedside examinations and photographing. Doppler fetus detector with digital display of fur t o be located in the pod. The fur Laparoscope's.

RAIOLOGY

Ultrasound scanner for abdominal ob'gynae and cardiac investigations, this will be located at ultrasound room in the opd. The scanner can be upgraded subsequently with Medium dhasoless OT lights for minor OT, which are designed to give concentrated light on the read of surgery with minimum dissipation of heat.

Mobile shadows less to lights (3 sets) one for minor to 2 for delivery rooms.

Ventilators (adult & pediatric) in ICU / CCU for intensive care, anesthesia and patient transportation. Adult ventilators two for majors ots.

Anesthesia machines two for major ots.

Tespirometers two for major or and one for ICU / CCU

ENT

Audiometer for testing hearing ability with automatic recording. Automatic operation at test frequencies from 0.25 - 8 khz or by random generator with rest sound level.

Miscellaneous instruments including auroscope tracheotomy sets etc.

TRAUMA CENTRE SERVICE

Trauma services will be provided for the peoples got some injuries on highways, treated & taken to this centre.

This Trauma Center Services would have 5 big ambulances consisting of all modern equipments needed for first aid for these type of cases.

MORTUARY

Mortuary chambers for storage of up to 3 bodies. Temperature of (-) 2 degrees to 4 degrees centigrade in maintained.

HOSPITAL FURNITURE

- Hospital Cots.
- Attendant's cots
- Flower position cots
- Cardiac cots 2 in CCU
- Maternity cots 3 in the wards
- Gynae examination table one in OPD and one in the ward
- labor table 3 in delivery rooms
- Cardiac tables 2 one in OPD and one in CCU
- Steel cupboards 35, 13 in consulting rooms, 3 in nursing section, 10 in main store, **2 in major OTS, 2 in ICU/CCU**

Additional

- Storage racks 20 in main stores
- Sofa sets for doctors duty room 3
- Cot with mattress for duty room
- Orgioaedu/ia tables one in consulting room and one in ward
- Examination tables
- Stretcher on trolley
- Pediatric beds in nursery
- Operation tables for major OT's
- Surgical table one for minor OT's
- ICU / CCU beds
- Air curtain for transparent insulation / barrier

WARDS

Repairable air pump this can provide a source of breathable air for the adult ventilator and can also be used in the intensive care unit as a standby in the even of main pump failure or as an alternative of expensive cylinder supply.

Additional software of carrying out blood flow studies and can be upgraded to conventional Doppler with an additional investment.

- Semi-automatic video imager to be located at ultrasound room
- Mobile x-ray machine 500 ma to be located in the nursing home.
- X-ray machine 500 ma to be located at OPD, the system can be upgraded to carry out fluoroscopic studies with image intensifier TB subsequently. The additional investment would be made and when required.

CENTRAL STERILE SUPPLY DEPOT

Portable autoclave for sterilization of instruments and dressings etc. this will be located at major OT.

Horizontal high-pressure cylindrical steam sterilizer for bulk sterilization of dressings linen surgical instruments glass wares utensils etc. this is based on the principal of microbiological action of saturated steam. This has in - built safety features to control the pressure and temperature. The capacity is 500 x 1200 mm.

Horizontal high-pressure high-speed cylindrical sterilization for built sterilization with size of 400 mm x 600 mm deep. It is fitted with

18 kw electric heater to furnish the sterilization within 6 minutes and is primarily intended for emergency sterilization of unwrapped surgical instruments etc.

Disinfector for decontamination of operations theaters & wards etc. it converts the liquid formal into aerosol particles which ensures

100% sterile germ free and zero bacterial environment and culminates the cumbersome conventional method of fumigation. It can sterilize about 9800 cu. ft in just 30 - 60 minutes.

OPERATION THEATER (OT)

Electro-surgical unit for surgical applications two for major OTS it has two independent high frequency generators for monopolar and bipolar applications. Lamp indication and audible tones are available on cutting coagulation and patients plate discontinuity. Blood gas monitor the range is 0 - 80 mm hg for PO₂ and 1- 200 mm hg PCO₂ with alarm adjustable for low and high limits for PO₂ and PCO₂ . Twin bottle electric suction apparatus designed for continuous work. Each glass receptacle has a capacity of 2.3 liters. Major OT light one set for each major OT designed for maximum light output with minimum heat dissipation.

ESTIMATED PROJECTED COST OF HOSPITAL (FOR 1000 BEDS)

<u>Cost of Land</u>	All ready with the Trust
Land Development (Road leveling etc.) (7,00,000 sq. ft. @ Rs. 400 sq. ft.)	28,00,00,000
Fencing / Boundary of the site @ Rs. 400 sq. ft.)	28,00,00,000
<u>Hospital Building</u> (Approx 450,000 sq. ft. @ Rs. 1500 sq. ft.)	58,80,60,000
Development of Parks	40,00,00,000
<u>Other Facility</u> (Sewerage, flushing center, parking, architect fee etc.)	16,00,00,000
<u>Electrification</u> (Inclusive of DG set & Poles)	50,00,00,000
<u>Building of Nursing College</u> (50,000 sq. ft. @ Rs. 3000 sq. ft.)	15,00,00,000
<u>Hostel Building for nurses trainees</u> (20, 000 sq. ft. @ Rs. 1,000 sq. ft.)	2,00,00,000
<u>Residential area for Doctors, Nurses & Staff</u> (1,00, 000 sq. ft. @ Rs. 1,000 sq. ft.)	10,00,00,000
(A). Sub Total	247,80,60,000
 <u>COST OF EQUIPMENTS</u>	
Histopathology	8,50,00,000
Hematology & Serology	5,50,00,000

प्रस्ताव कार्यकारिणी

आज दिनांक 10.02.2008 को संस्था निर्बल वर्ग ग्रामोद्योग सेवा संस्थान, ग्राम व पो0 टपरी, जिला-सहारनपुर की एक कार्यकारिणी की सभा संस्था के पंजीकृत कार्यालय पर अध्यक्ष श्री सुधीर प्रकाश गुप्ता की अध्यक्षता में बुलाई गई। सभा में सभी पदाधिकारियों एवं सदस्यों की उपस्थिति रही। उपस्थिति कोरम पूर्ण रहा। सभा में संस्था की पंजीकृत नियमावली व स्मृति पत्र में आमूल चूल परिवर्तन किए जाने व संस्था का पता परिवर्तन करने पर विचार किया गया।

प्रस्ताव संख्या 01

संस्था का पता परिवर्तन करने पर विचार

: सभा में सभी उपस्थित पदाधिकारियों एवं सदस्यों को अवगत कराया गया कि संस्था का पता ग्राम व पो0 टपरी जिला- सहारनपुर से बदलकर 563 ख/4, मंगलखेड़ा, आलमबाग, लखनऊ कराने का प्रस्ताव रखा क्योंकि संस्था बड़े शहर में कार्य करने की मंशा रखती है अपना नाम रोशन करने के उद्देश्य से संस्था का पता परिवर्तन किया जा रहा है। इस प्रस्ताव की सभी ने अपनी सहमति प्रकट की।

प्रस्ताव संख्या 02

स्मृति पत्र व नियमावली में आमूल परिवर्तन किए जाने पर विचार

: सभा में सभी उपस्थित पदाधिकारियों एवं सदस्यों को अवगत कराया गया कि संस्था की उन्नति के लिए एवं सोसायटी रजिस्ट्रेशन एक्ट के अनुसार संस्था की पंजीकृत स्मृति पत्र व नियमावली में आमूल चूल परिवर्तन किया जाना है। संशोधित स्मृति पत्र व नियमावली का प्रारूप तैयार किया गया तथा सभा के समक्ष पढकर सुनाया गया सभी ने सुनकर अपनी सहमति प्रकट की।

संशोधित स्मृति-पत्र

26

1. संस्था का नाम : निर्बल वर्ग ग्रामोद्योग सेवा संस्थान
2. संस्था का पूरा पता : 563 ख/4, मंगलखेड़ा
आलमबाग, लखनऊ
3. संस्था का कार्यक्षेत्र : समस्त भारतवर्ष
4. संस्था के उद्देश्य : संस्था के निम्नलिखित उद्देश्य होंगे -

1. समिति के कार्यक्षेत्र के निवासियों का नैतिक सामाजिक, सांस्कृतिक उत्थान करना।
2. शिक्षा के प्रसारण में पाठशालाओं, महिला, सिलाई, कढ़ाई, बुनाई, नारी उत्थान तथा प्रौढ़ पाठशालाओं आदि की स्थापना कराना तथा जनता की रचनात्मक तरीके से सेवा करना।
3. छोटे-छोटे कुटीर उद्योगों के प्रशिक्षण केंद्र खुलावाना और समाज में अधिक आय के अवसर प्रदान करना।
4. जनहित में कुटीर उद्योग ग्रामोद्योग, कृषि उद्योग, मछली पालन, पशुपालन आदि के क्षेत्र में आने वाली योजनाओं के वितरण हेतु प्रशिक्षण केंद्र से प्रचार-प्रसार करना।
5. उद्देश्य की पूर्ति हेतु वन विभाग, खादी ग्रामोद्योग बोर्ड तथा खादी ग्रामोद्योग आयोग, सरकारी तथा गैर सरकारी आर्थिक सहायता प्रदान करने वाली समस्त एंजेन्सियों, स्थानीय निकाय राष्ट्रीयकृत बैंक आदि से आर्थिक सहायता प्राप्त कर योजनाओं को क्रियान्वित कराना और योजनानुसार सम्बन्धित कार्य को करना और उनके द्वारा अपनायी गई नीतियों एवं नियमों के अनुसार कार्य में परिणित करना, ऋण आदि का सदुपयोग करना तथा वापस करना।
6. 20 सूत्रीय कार्यक्रम को पूरा कराने में सरकार को सहायता करना जैसे दहेज प्रथा समाप्त कराने का प्रचार प्रसार करना, हितकारी कार्य कराना व जनता में शजरकारी लगवाने की भावना जागृत करना, हितकारी कार्य कराना तथा शजरकारी उत्तर प्रदेश वन विभाग में सहायता प्राप्त कर तथा नर्सरी शजर कार्य करने के लिए भूमि का प्रबन्ध कराना, उपजाऊ भूमि के साधन प्राप्त करना और विभिन्न किस्मों के आयुर्वेदिक पौधों एवं औषधियों को खोजकर जनता को उनसे होने वाले फायदों से अवगत कराना।
7. संस्था की आवश्यकता हेतु भूमि भवन की व्यवस्था कराना तथा आवश्यकता पड़ने का क्रय करना।
8. संस्था उ०प्र० खादी तथा ग्रामोद्योग बोर्ड द्वारा तथा खादी ग्रामोद्योग आयोग की सूची में मान्यता प्राप्त कर ग्रामोद्योग की स्थापना करके संस्था द्वारा उत्पादन एवं बिक्री करना तथा बिक्री से प्राप्त लाभ को चैरिटेबिल कार्यों में व्यय करना।
9. चिकित्सा स्वास्थ्य सेवाएँ प्रदान करना तथा देश भर में स्वास्थ्य का स्तर सुधारने हेतु तथा इससे सम्बन्धित जानकारी का प्रचार एवं प्रसार करने हेतु विभिन्न कार्यक्रमों को प्रतिपादित करना, जैसे-कैम्प एवं केंद्र आदि खोलना एवं उनका प्रबन्धन करना होगा, वृक्षारोपण, पर्यावरण तथा स्वच्छता से सम्बन्धित जानकारी का प्रचार-प्रसार करना तथा सरकारी तथा गैर सरकारी संगठनों आदि की विभिन्न योजनाओं को जन-हित में क्रियान्वित करना।
10. स्वास्थ्य शिविर धर्मार्थ चिकित्सालयों का निर्माण, एम्बुलेंस का निःशुल्क प्रबन्धन करना।
11. जन सामान्य को अच्छी शिक्षा (एकड़मिक एवं तकनीकी) निःशुल्क उपलब्ध कराना।

Progress Report (2015-2016)

Under various Awareness Programmes of social welfare activities, economic emancipation and social up upliftment of women is the crying need of the day and that too specially of rural women folk who are downtrodden, literate, ignorant of their rights and economically backward also.

1. Plantation & Environment Protection :

Under the environment Protection Programme for the general welfare of the People at large, awareness was given to safeguard air pollution, to adopt means to check soil erosion and protection from the harmful effects of short seasonal rains.

Our organization members and staff has planted more than 3500 plants of neem, mango etc. in deferent areas of Uttarakhand.

Apart from above, our Institution organized environment protection awareness camps with the inclusion of children of schools of villages at Haridwar and made them aware with the usefulness of keeping environment neat and clean; proper garbage disposal; avoiding air, noise, smoke, dust and sound pollution; harmful effects of Polythene and means of its safe and proper disposal for the safety of public health and environment so that blockage of drains and nalas may not be created and fertility of soil may be secured along with safety from other defects of this harmful item. After use disposal of this item should be environment friendly for the people in general.

2. Awareness Camps

One day awareness camp especially for rural women focus was organized at Five villages of Block Laksar. The activities included making women aware of their rights and duties, legal protection, child health and education importance and looking after family health specially children. Above all increasing family income by engaging them in some or the other vocational trade for the general upliftment of the family.

3. Drugs abuse camps

Drugs abuse camps were also organized by persuading effected people with the help of local inhabitants and social workers. Such identified cases were accorded medical treatment besides psychological treatment and influence through their own family member's neighbour and enlightened people of the area. Thereafter kept constant vigil so that they may not return again to the addiction which harmed themselves and their families, financially and socially.

4. Environmental Consciousness

We organized continued camps for creating environmental consciousness among the people which which included improving their hygienic condition of livings and surroundings to protect the masses from the effects of disease and health which spreads due to ingorance of environmental effects.

5. Rehabilitation of Socially Backward uncared for and dependent women

Our organization from its outset have been engaged helping poor and needy women by making them rehabilitated to Swathe shelter Home. This task has been a continuous endeavour endeavour in our activities to search and locate such women and rehabilitate them through our social welfare activities taken up from time to time.

Free Distribution of Books

We distributed free books to 50 children of Bahadrabad block villages. Who were not able to purchase the books for studying?

Computer Education :

We have provided free Computer Education to 100 students in Haridwar City under Basic Computer Education for under graduate students and labour employees of SIDCUL, Haridwar.

Progress Report (2014-2015)

Under various Awareness Programmes of social welfare activities economic emancipation and social upliftment of women is the crying need of the day and that too specially of rural women folk who are downtrodden, illiterate, ignorant of their rights and economically backward also.

1. Consumer Protection Awareness Camps

In this year our Institution organization two Consumer Protection Awareness Camps in which the rights of Consumers were made known and knowledge regarding consumers forum was described in details for the protection and safeguard of consumer rights.

2. Plantation & Environment Protection Program

Under the environment Protection Programme for the general welfare of the People at large, awareness was given to safeguard air pollution to adopt means to check soil erosion and protection from the harmful effects of short seasonal rains.

Apart from above, our Institution organized environment protection awareness camps with the inclusion of children of schools of villages at Saharanpur and made them aware with the usefulness of keeping environment neat and clean; proper garbage disposal; avoiding air, noise, smoke, dust and sound pollution; harmful effects of Polythene and means of its safe and proper disposal for the safety of public health and environment so that blockage of drains and nallas may not be created and fertility of soil may be secured along with safety from other defects of this harmful item. After use disposal of this item should be environment friendly for the people in general.

3. Awareness Camps

One day awareness camp especially for rural women focus was organized at eight villages of Block Narsan. The activities included making women aware of their rights and duties, legal protection, child health and education importance and looking after family health specially children. Above all increasing family income by engaging them in some or the other vocational trade for the general upliftment of the family.

4. Drugs abuse camps

Drugs abuse camps were also organized by persuading effected people with the help of local inhabitants and social workers. Such identified cases were accorded medical treatment besides psychological treatment and influence through their own family member's neighbour and enlightened people of the area. Thereafter kept constant vigil so that they may not return again to the addiction which harmed themselves and their families, financially and socially.

THE MANAGEMENT

NIRBAL VARG GRAMODHYOG SEWA
SANSTHAN, G-19A SURYA COMPLEX
RANIPUR MORE HARDWAR.

Audit report under section 12A (b) of the Income-tax Act, 1961, in the case of Charitable or religious trusts or institution

We have examined the balance sheet as at 31st March 2015, and the Income and Expenditure account for the year ended on that date, attached herewith of NIRBAL VARG GRAMODHYOG SEWA SANSTHAN [PAN No AAAAN6448A}. These financial statements are the responsibility of the management. Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in India. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement(s). An audit includes examining, on test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principals used and significant estimates made by the management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis of our opinion.

We certify that the balance sheet and the Income and Expenditure account are in agreement with the books of account maintained at the head office at G-19A, Surya Complex, Ranipur More - Haridwar (U.K.) and branches NIL.

We have obtained all the information and explanations, which, to the best of our knowledge and belief, were necessary for the purposes of the audit. In our opinion, proper books of account have been kept by the trust/Institution, subject to the notes on account.

In our opinion, and to the best of our information, and according to information given to us, the said accounts, read with notes thereon, if any, give a true and fair view in conformity with the accounting principals generally accepted in India.

- (i) In the case of the Balance Sheet, of the state of the affairs of the assessee as at 31st March 2015, and
- (ii) In the case of the Income and Expenditure account of the Surplus of its accounting year ending on 31st March 2015.

The prescribed particulars are annexed here to.

हर खबर समय पर

बदलती जीवन शैली की वजह से तनाव का शिकार हो रह लोग: डॉ. आलोक श्रीवास्तव

निःशुल्क चिकित्सा शिविर आयोजित किया

नई दिल्ली, बुधवार, 03 नई 2018

नेशनल एक्सप्रेस व्यूरो

हरिद्वार) निवृत्त वर्ग ज्ञानोद्योग सेवा संस्था की ओर से अशुक्ल अपुर्विक कर्तव्य के पथक में विभाग के परिवार में तनाव मुक्ति के लिए निःशुल्क चिकित्सा शिविर का आयोजन किया गया।

शिविर में आने वाले मरीजों को तनाव दूर करने के लिए चिकित्सकों टीम द्वारा परामर्श भी दिए गए। चिकित्साकीय टीम में डॉ. आलोक कुमार श्रीवास्तव, डॉ. पूनम शर्मा, डॉ. ललित शर्मा, डॉ. प्रियंका शर्मा, डॉ. गरीमा धरूया, विद्या कुठियल

आदि ने मरीजों को जंच का निःशुल्क दवाईयां प्रदान की। डॉ. आलोक कुमार श्रीवास्तव ने कहा बदलती जीवन शैली की वजह से लोग तनाव का शिकार हो रहे हैं। गणतंत्र में जीवनशैली के चलते आनखन के प्रति खतराकारी की वजह से भी तनाव लगायी हो घेर रहा है। उन्होंने कहा कि तनाव की वजह से कई दूसरी बीमारियों में शरीर में भर कर लेती है।

ऐसी स्थिति में समय-समय पर चिकित्सकों परामर्श लेने के साथ आनखन पर भी ध्यान देना चाहिए। इसके अलावा जीवनशैली में बदलाव

कर तनाव से बचने का प्रयास करना चाहिए। निवृत्त वर्ग ज्ञानोद्योग सेवा के अध्यक्ष सुधीर प्रकाश गुप्ता ने कहा कि इसके पूर्व भी मरीजों को निःशुल्क चिकित्सा सेवा उपलब्ध कराने के लिए अशुक्ल कालेज परिसर में चिकित्सा शिविर का आयोजन किया गया था। आगे भी मरीजों की सेवा के लिए चिकित्सा शिविर आयोजित किए जाएंगे।

सर्वजनों के अन्य सदस्यों ने भी शिविर के आयोजन में सहयोग प्रदान किया। समाज सेवा से जुड़कर मन को शांति मिलती है। मानव सेवा ही सबसे बड़ा धर्म है। प्रशंसा शब्दों ने कहा कि

सामाजिक शरोकारों से जुड़कर मानव कल्याण में अपना सहयोग अवश्य प्रदान करना चाहिए। संस्था गरीब अस्तित्व निर्धन लोगों की मदद के लिए सदाचार अपने प्रयास कर रही है।

मौलिन बरितवा ने शिक्षा एवं स्वास्थ्य को लेकर कई कैम्प आयोजित किए जा चुके हैं। अशुक्ल परिसर तनाव उदासी को लेकर चिकित्सा शिविर में चिकित्सकों द्वारा बेहतर परामर्श मिलेगी जो प्रदान किए गए। साथ ही निःशुल्क दवाईयां भी दी गयी। इस अवसर पर राधेशंकर शर्मा, अमित आदि ने सहयोग प्रदान किया।

मरीचों की जाँच करते हुए चिकित्सक।

गंगा स्वच्छ रखना सभी का दायित्व

जागरण संवाददाता, हरिद्वार: सुगम धार्मिक पर्यटन योजना के अंतर्गत हरिद्वार पुलिस एवं छात्र-छात्राओं ने हरको पैड़ी समेत गंगा घाटों पर सफाई अभियान चलाया। इस दौरान एसएसपी कृष्णकुमार वीके ने कहा कि गंगा को प्रदूषण मुक्त रखना एवं स्वच्छ रखना सभी को ज़िम्मेदारी है। कहा कि पीतत पावनी गंगा में गंदगी न डाले।

बुधवार को सुगम धार्मिक पर्यटन योजना के अंतर्गत हरको पैड़ी में स्कूली छात्र-छात्राएं समेत पुलिस अधिकारी एकत्र हुए। इस दौरान एसएसपी कृष्णकुमार वीके ने कहा कि गंगा में बढ़ता प्रदूषण चिंता का विषय है। उन्होंने कहा कि जानबूझकर व भूलकर कूड़ा व गंदगी में पिर जाती है, जिसके चलते गंगा में प्रदूषण बढ़ रहा है। कहा कि गंगा को स्वच्छ रखने में सरकारी मशीनरी समेत आमजन का भी सहयोग ज़रूरी है। स्वच्छता अभियान अपने घर व गली मोहल्ले से शुरू होना चाहिए। सोओ जेरो जुबल ने कहा कि लोगों को चाहिए कि कूड़ा व गंदगी कूड़ेदान में ही डालना चाहिए। इस दौरान महिला महाविद्यालय, सेवा सदन इंटर स्कूल, भक्त कल्याण, आदि की अलग अलग टीमों ने हरको पैड़ी,

Nirbal Varg Gramodyog Sewa Sansthan

Our organisation from its outset have been organising competition like painting, Essa, cultural activities in several schools or haridwar for student awareness and upliftment of their growth and living.

Nirbal Varg Gramodyog Sewa Sansthan

An Art Competition has been held under supervision of higher qualified examination for upliftment of poor student and giving the increment of their mental level as well as the prize distribution has been also done by our Organization so that students get the proper recruitment and they can know their ability doing good work.

Under the environment Protection Programme for the general welfare of the People at large, awariness was given to safeguard air pollution, to adopt means to check soil erosion and protection from the harmful effects of short seasonal rains. A part from above our Institution organized environment protection awareness camps with the inclusion of children of schools of villages at Almora and made them aware with the usefulness of keeping environment neat and clean.

We organized camps for creating environmental consciousness among the people which included improving their hygienic condition of living and surroundings to protect the masses from the effects of disease and ill health which spreads due to ignorance of environmental effects. So that blockage of drain and nallas may not be created and fertility of soil may be secure along with safety from other defects of this harmful item. After use disposal of this item should be environment friendly for the people in general.

बेटी बचाओ अभियान के तहत निकाली रैली

□ लोगों को भूषण हत्या
रोकने के लिए किया
जागरुक

हरीद्वार (प्रभात)। बेटी बचाओ अभियान को लेकर निर्मल वार्ड ग्रामोद्योग सेवा संस्थान व बाइकर्स क्लब सहारनपुर ने संयुक्त रूप से जागरुकता रैली निकाली। इस दौरान उन्होंने नगर निगम के टाउन हॉल पहुंचकर हरीद्वार के एसएसपी राजीव स्वरूप से मुलाकात कर

सम्मिलित भी किया। इस मौके पर एसएसपी राजीव स्वरूप ने कहा कि निर्मल वार्ड ग्रामोद्योग सेवा संस्थान व बाइकर्स क्लब के सदस्यों द्वारा भूषण हत्या बेटी बचाओ अभियान एक सार्वजनिक कदम है। जिससे लोगों में जागरुकता फैलाने का प्रयास सफल होगा। आज आवश्यकता है कि भूषण हत्या बन्द हो और देश में बेटीयों की संख्या में वृद्धि हो, क्योंकि दिनों दिन लिंग अनुपात में अंतर बढ़ता जा

रहा है और एक दिन ऐसा आयेगा कि अपने बच्चे की शादी करने के लिये लड़कियां बूढ़े नहीं मिलेंगी। निर्मल वार्ड ग्रामोद्योग सेवा संस्थान के संचालक सुधीर प्रकाश गुप्ता ने कहा कि उनका संस्थान समय-समय पर समाज को कुरितियों पर कुदरायात करने वाले तमाम विषयों पर समय-समय पर जागरुकता रैली निकालता है। इस अवसर पर सुमित कौशिक, ड. एसके सेठ आदि मौजूद रहे।

Our Organization has been Organized motor cycle bickers Kali in favour of Beti Bachao Abhiyan against fetal death. This rally has been Organized from Ranipur more upto Town hall of Nagar Nigam whole the haridwar. S.S.P has been weat their for their honor. So it is so necessary for fetal death should be closed. India should be free from Beti Bachao. So that should be peopasshate.

Under Various Awareness Programmes of social welfare activities, economic emancipation and social upliftment of women is the crying need of the day and that too specially of rural women folk who are downtrodden, illiterate, ignorant of their right and economically backward also.

In this year our institution organized two Consumer Protection Awareness Camps in which the rights of Consumers were made known and knowledge regarding consumers forum was described in details for the protection and safeguard of Consumer's rights.

Nirmal Varg Gramodyog Sewa Sansthan

Our organisation from its out-set have been engaged helping poor and village women form making them rehabilitated. This task has been a continuous endeavour in our activities to search and locate such women and rehabilitate them to Swadhar home

Nirmal Varg Gramodyog Sewa Sansthan

One day Awareness camp specially for rural women focus were organised at eight villages of Block Laksar. The activities included making women aware of their rights and duties, legal protection, child health and education importance and looking after family health specially children. above all increasing family income by engaging them in some or the other vocational trade for the general upliftment of the family.

Nirmal Varg Gramodyog Sewa Sansthan

Distribution of Blankets for poor and needy people.

While due to heavy rain fall in last winter our organization held an program for distribution of blankets for poor and needy peoples. Who cant even buy an blankets for there wear.
